# INDEPENDENT DRIVING

## QUICK RELEASE LEFT FOOT ACCELERATOR

The **Left Foot Accelerator** was developed for those with who do not have use or full function of their right leg as an alternative choice to hand controls.

The Quick Release model of the Menox Left Foot Accelerator serves as a versatile solution that doesn't require any permanent fixtures to the vehicle. It also does not limit the vehicle to exclusively left foot drive, as the the **quick release** pedal can be easily flipped back up, restoring regular use of the right foot accelerator.

This solution is intended for user's who cannot rely on their right leg/foot to safely operate a motor vehicle. Fortunately, it only takes a few hours to install this product and to get the user back into their vehicle. It has a stringed pin allowing the product to be quickly released and taken out of the vehicle, this provides more comfort for those using the vehicle's factory driving controls.

There are alternative versions of the **Left Foot Accelerator** that can be tailored to suit each individuals specific needs, making this a highly sought after solution for independent drivers.
