

GETTING SEATED UNWIN RESTRAINTS

GETTING SEATED UNWIN RESTRAINTS

With over 60 years in the industry, Unwin - an Autoadapt company, is a pioneer in wheelchair restraint and occupant safety solutions. All manufacturing, design and testing facilities are located in a modern factory in Somerset, UK. Trusted across the world by passengers and safety professionals, Unwin delivers complete wheelchair safety solutions to maximise accessibility for all.

This four point webbing, wheelchair restraint system that connects and locks into alloy rails attached to the vehicle floor with quick release press buckles for emergency release. The restraints can be easily removed when not in use or relocated for alternative seating arrangements. The system offers a choice of either a lap belt or a double inertia lap sash harness for the effective restraint of the wheelchair occupant, which attaches directly to the floor rails.

FEATURES

-  Powered movement in six directions
-  Adjustable comfort positions
-  Optional foot rest
-  Available for both the driver and passenger seating positions
