VEIGEL COMAPCT II

HAND CONTROLS

VEIGEL COMAPCT II

This is the second generation of the very popular **Veigel Compact** hand control! With a new ergonomic design, this handle makes controlling the acceleration and brake functions of the car simple with a push / pull principle.

To further benefit the user, there is a safety control that allows the movement features to be blocked when not in motion. To allow room for other drivers to use the vehicle without the assistance of the hand control, the **Veigel Compact II** can be folded back, meaning your vehicle is still user friendly for all family members!

The **Veigel Compact II** hand control is also available in genuine leather. Standard colors are black, red and beige; also available to coordinate with your car's leather interior.

FEATURES

-  Universal fitting to suit most vehicle models.
-  Hill holder function.
-  Operated with your left hand.
-  Recommended for use with automatic vehicles only.

SPECIFICATIONS

-  Upgrade option to allow for auxiliary control on the handle: Indicators, wipers, headlight, horn.
-  Left hand operation with right hand used for steering of the vehicle.

BENEFITS

-  Comfortable driving position.
-  Retains all the vehicles factory safety features and functions: full steering wheel movement and does not affect airbag operation.
-  Allows easier transfer into the vehicle clearing obstructions under the steering wheel.
