MOBILITY ENGINEERING

Transfer Solutions
Turny Evo

Effortless mobility redefined - the **Turny Evo** brings the seat out of your vehicle for easy access, then smoothly lifts you into place with the touch of a button, enhancing independence and comfort for everyone.

The **Turny Evo** is a fully automatic, programmable swivel seat that extends completely outside the vehicle, providing ample space for smooth and safe transfers. Designed to simplify vehicle access for those needing assistance, the **Turny Evo** lifts occupants effortlessly into the car at the touch of a button. With features like adjustable movement paths, 390mm of vertical travel, and full backrest adjustability, the **Turny Evo** combines versatility with comfort.

This innovative system is compatible with low-profile seats for optimized head and knee room and can pair with the Carony wheelchair transfer system, offering an easy, lift-free transition from wheelchair to vehicle.
