

The **Stamp Pedal Extension** is a practical solution for drivers who experience difficulty reaching standard vehicle pedals - ideal for individuals of short stature, those who are pregnant, overweight, or living with hip or knee limitations. Offering an adjustable extension range of 10–30 cm, the system allows fine-tuning of pedal height, distance, and spacing for optimal comfort and control. Compatible with both automatic and manual vehicles, it features a quick-release mechanism for easy removal when not in use.

To ensure a safe and ergonomic driving position, additional adaptations such as seat cushions, sash guides, or airbag modifications may be recommended depending on the driver's proximity to the steering wheel.

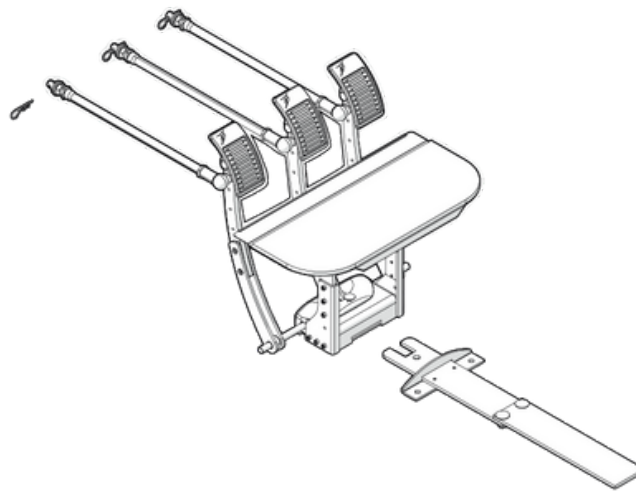

Functional Benefits

- Improved driving accessibility
- Flexible setup for individual needs
- Supports safe driving posture

Key Features

- Adjustable extension range
- Quick release mechanism
- Universal compatibility

Specifications

- Extension range - 10-30cm
- Suitable for vehicles with both automatic and manual transmissions
